*requires having a UW email account setup at time of account creation.

**Can't I just forward that to my gmail/yahoo/etc email instead?**
Sure, you can forward the UW email account to anywhere you wish. In fact, here's some instructions to help you do it. [https://kb.wisc.edu/page.php?id=36539](https://kb.wisc.edu/page.php?id=36539)

Do be careful forwarding any official communication to a non-UW provider. If the account is compromised and official information is breached, the UW cannot help you.

**How can I set this up on my devices?**
There are very specific instructions for setting up UW email accounts on any device. [https://kb.wisc.edu/page.php?id=30220](https://kb.wisc.edu/page.php?id=30220)

**Technology@Math ....**

**Server space:** Every person with a math account has 10G of server space. This is used when you log into a computer. Any data you create while using a computer that is part of our system is stored on the server.

If you'd like to see how much space you have left in your personal space, type “quota” at an SSH terminal on a Math Department computer.

**Web space:** Within your server space is a folder called public. Inside that is a folder called html. This is where you can create a personal web page.

Don't know how to make your own website? Check out UW Google Sites for easy fast website templates. [https://sites.google.com/a/wisc.edu](https://sites.google.com/a/wisc.edu)
Printing: Using the math department computers allows you to print up to 250 B/W pages a month. These pages are assumed to be used in instruction and administration.

- If you go above 250 B/W pages a month, you'll be billed for each additional print at a cost of .04 a print.
- If you print in color, those are automatically billed at a cost of .20 a print.

Copier Code: If you’d like to use the copier/printer for making copies, you’ll be provided with a copier code in an email sometime during your first weeks of work. Any copies made using that copy code are considered part of your printing quota of 250 free B/W copies a month.

If you type “pages” at a command prompt on a Math Department machine, you’ll see your current count.

If you’d like to know your copier code, type "whatsmypin" at a command prompt.

Scanning: Each printer has a scanning functionality for creating PDFs. You can use this without cost. It will send to any email associated with the Math Department.

Office Space: Most graduate students are given an office and in each graduate student office is a computer that allows you to sign in with your math account id. If that is not sufficient, there are two math department labs.

Room 322: has several Linux machines (and 1 Mac) that will allow users access to all Math Department Resources; allows printing on floor 3.

Room 101: has several Linux machines (and 1 Mac) that will allow users access to all Math Department Resources, allows printing in 101.

Computer Classrooms: B107 is a computer classroom for 20 students with computers and a projector. B102, B231, B223, B239, and 901 have projectors.

Math Library: Offers checkout of projectors and laptops with valid student IDs for 4 hours.

Specific software available to Math Department Faculty, Staff and Students

- Matlab
- Maple
- Macaulay
- Magma (specific servers)
- Octave
- Sage

Check out software.wisc.edu for many pieces of software available for download for free.

Can't find a piece of software and you need it? Please ask! staff@math.wisc.edu

The IT staff will NEVER ask for your password via email/webform.

Never communicate your passwords via email no matter who asks.
